A delivery team that already supports UK businesses

CV Cloud Services Private Limited is an India-based accounting and digital services company led by Vineel Jangam, who has run end-to-end operations for a UK tax and accounting business — covering the tax team, accounting, marketing, design, development and customer support. We work with UK clients, including construction businesses, and we understand UK deadlines, HMRC processes and the way UK clients expect to be treated. We build our service around your firm's standards, under your brand.

Cost-effective

significant savings versus UK in-house hiring

UK hours

overlap with your working day

White-label

your brand, your client relationship

What we do

Accounting & tax services

- Bookkeeping & reconciliations
- Monthly management accounts
- Year-end accounts preparation
- CIS monthly returns & CIS refunds
- Self Assessment returns
- VAT returns & MTD for VAT
- MTD for Income Tax support
- Payroll & pension submissions
- Support during VAT and Corporation Tax audits

Registrations & compliance

- Company incorporation
- VAT registration and deregistration
- CIS registrations
- Confirmation statement filing
- Directors' personal identity verification support

Digital & growth services

- Website design & development
- SEO for accountancy practices
- Google Ads management
- Lead-capture & client-portal pages
- Reporting dashboards

Why firms choose us: you keep the client, the fee and the relationship. We take the repetitive production work, so your UK team can focus on advice, review and growth.

Accounting for the construction industry

Construction clients are paperwork-heavy and deadline-driven: CIS deductions, subcontractor verification, VAT domestic reverse charge, retentions, and sole traders who need a reliable monthly rhythm. We work with UK construction clients every month, handling this exact work.

Construction service	What's included
CIS monthly returns (contractors)	Payment & deduction statements, monthly CIS300 filing, nil-return handling
Subcontractor set-up & verification	Adding new subcontractors, HMRC verification before first payment, gross/net status and verification-number records, re-verification when needed
CIS for subcontractors	Gross/net status tracking, deduction records, CIS refund claims through Self Assessment
VAT domestic reverse charge	Correct VAT treatment on construction invoices, quarterly VAT returns
Job & retention tracking	Job-level income/cost reports, retention schedules
Self Assessment for tradespeople	Bricklayers, electricians, plumbers, labour-only subcontractors — expenses, CIS credit, tax due
Year-end accounts	Sole trader, partnership and limited company accounts for your review & sign-off
CIS registrations	Registering contractors and subcontractors with HMRC's Construction Industry Scheme

Reliable

Monthly CIS and VAT calendars tracked per client, with reminders ahead of every deadline.

Accurate

Checklists and a second-person review before anything reaches you.

Scalable

Add 10 or 100 construction clients without recruiting in the UK.

Accounting, tax & compliance

Service	Scope
Bookkeeping	Bank & card coding, reconciliations, supplier/customer ledgers, month-end packs (Xero, QuickBooks, FreeAgent, Sage)
Monthly management accounts	P&L, balance sheet, cash-flow summaries, budget vs actual and KPI dashboards each month
Accounts preparation	Draft statutory or sole trader/partnership accounts and tax computations for UK review
Self Assessment	Full SA100 with supplementary pages, prepared for your sign-off and filing under your agent authority
CIS returns	Monthly contractor returns and subcontractor tax records
VAT & MTD for VAT	Quarterly returns, workings and MTD-compatible submissions via your software
MTD for Income Tax	Quarterly update preparation, digital records set-up, client onboarding support
Payroll	Payslips, RTI submissions, pension auto-enrolment files, P60/P11D support
Audit & enquiry support	Support during any VAT or Corporation Tax audit: assembling records, reconciling workings, preparing responses for your review

All filings are prepared for **your** review and submitted through **your** HMRC agent authorisation and software unless you instruct otherwise.

Company and tax registrations, handled for you

We can also take care of the registrations your clients need at start-up and throughout the year, so your team does not have to chase forms and deadlines.

Registration	What's included
Company incorporation	Name check, Companies House application, director/shareholder details, articles, and a statutory register set-up
VAT registration & deregistration	Eligibility check, registration with HMRC, scheme selection (standard, flat rate), and deregistration where required
CIS registrations	Contractor and subcontractor registration, gross payment status applications
Confirmation statement filing	Annual review of company details and timely filing at Companies House
Directors' personal identity verification	Guidance and support for directors completing Companies House identity verification

Registrations are submitted under your firm's authorisation or the client's own credentials, and we provide the prepared information and the follow-up you need to keep each client compliant.

Web design, SEO & Google Ads for accountancy practices

We run the digital side of a UK tax services business day to day. The same team can help your practice win and convert more clients online.

Website design & development

- Fast, mobile-first practice websites
- Service pages built to rank and convert
- Online enquiry, booking and onboarding forms
- Care plans: hosting, updates, security

SEO

- Keyword research for UK tax & accounting searches
- On-page and technical SEO
- Local SEO & Google Business Profile
- Monthly content and reporting

Google Ads

- Campaign set-up and optimisation
- Conversion tracking & call tracking
- Seasonal Self Assessment campaigns
- Transparent cost-per-lead reporting

Client portals & tools

- Secure document upload pages
- Deadline reminder workflows
- Custom admin dashboards
- Integrations with your software stack

Most firms start with bookkeeping or Self Assessment production, then add digital marketing once the back office is running smoothly.

How it works

1

Discovery call

We review your volumes, software and deadlines, agree which work to hand over, and discuss a package and pricing that suits your firm.

2

Pilot batch

We start with a small batch of work so you can judge quality and fit before committing further.

3

Onboarding & SOPs

We document your procedures, templates and review standards, then assign a dedicated team.

4

Ongoing delivery

Work arrives through your software or a shared tracker, returns for your review, and you file under your own name.

Flexible engagement

Per task

Pay per return, per client or per project — ideal for peaks and trials.

Dedicated team member

A trained person working as an extension of your team, on a monthly basis.

Project work

Websites, SEO and ad campaigns scoped and agreed up front.

Pricing is tailored to your volumes and needs and agreed on a call.

Confidentiality & data protection

We sign an NDA and a UK GDPR-compliant data processing agreement with international transfer safeguards before handling client data. Access is role-based, work is done on managed devices, and we use your own cloud software wherever possible so data stays in your systems.

Let's take the workload off your desk.

Book a call to discuss your needs and how we can support your firm.
